

"Excellent wines rely on the same quality of logistics solutions".

Wein-Lagerlogistik GmbH, Parndorf — Comfort and Temperature Stability

"When wine specialists and logistics specialists work together, this produces the highest level of quality and satisfaction at all levels! "

As the premier wine logistics specialist in Austria, Wein-Lagerlogistik GmbH prides itself on meeting and exceeding the needs of the customer to ensure the highest standards of quality and satisfaction in the handling of this special and sensitive product.

Wein-Lagerlogistik GmbH is well known for achieving these standards far beyond its regional borders. From its company headquarters in the wine-producing region of Lake Neusiedl, this Austrian wine specialist successfully manages its wine logistics operations.

The neighboring region is also home to the company headquarters of the Austrian specialists for the most advanced, secure and efficient entrance and logistics solutions - ASSA ABLOY Entrance Systems. It therefore seemed logical to combine the excellent qualities of both companies to produce excellent results and the highest quality standards for all levels of wine storage logistics.

For Wein-Lagerlogistik GmbH to be successful, the company has the following special requirements:

- Comfort and safety
- Maximum care when handling the wine and industrial trucks
- Absolute temperature stability

ASSA ABLOY Entrance Systems designed a logistics solution with a swing lip dock leveler with seamless transfer to ensure 50 percent less impact forces when loading and unloading the wine, and guarantees double the service life of the casters on the industrial trucks.

Ball-bearing mounted dock shelters and high-speed gates also ensure temperature stability in the wine hall.

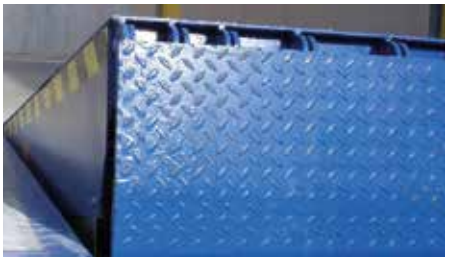

Today, more than 90 successful wine producers store their high-quality wines in the reliable and sustainable wine logistics hall.

Contact ASSA ABLOY Entrance Systems GmbH (Tel. no. 01 914 55 37) to receive more information on your automatic entrance solutions.
