ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Safe docking

"In order to stand out in the logistics service sector, you must work in a reliable, modern, efficient, fast and safe manner. Not just our service portfolio focuses on this but also our facilities. The door solutions by ASSA ABLOY Entrance Systems contribute decisively to our aim of optimum and safe service"

Theo Hoogveld, Specialist Facility DSV Logistics.

Background

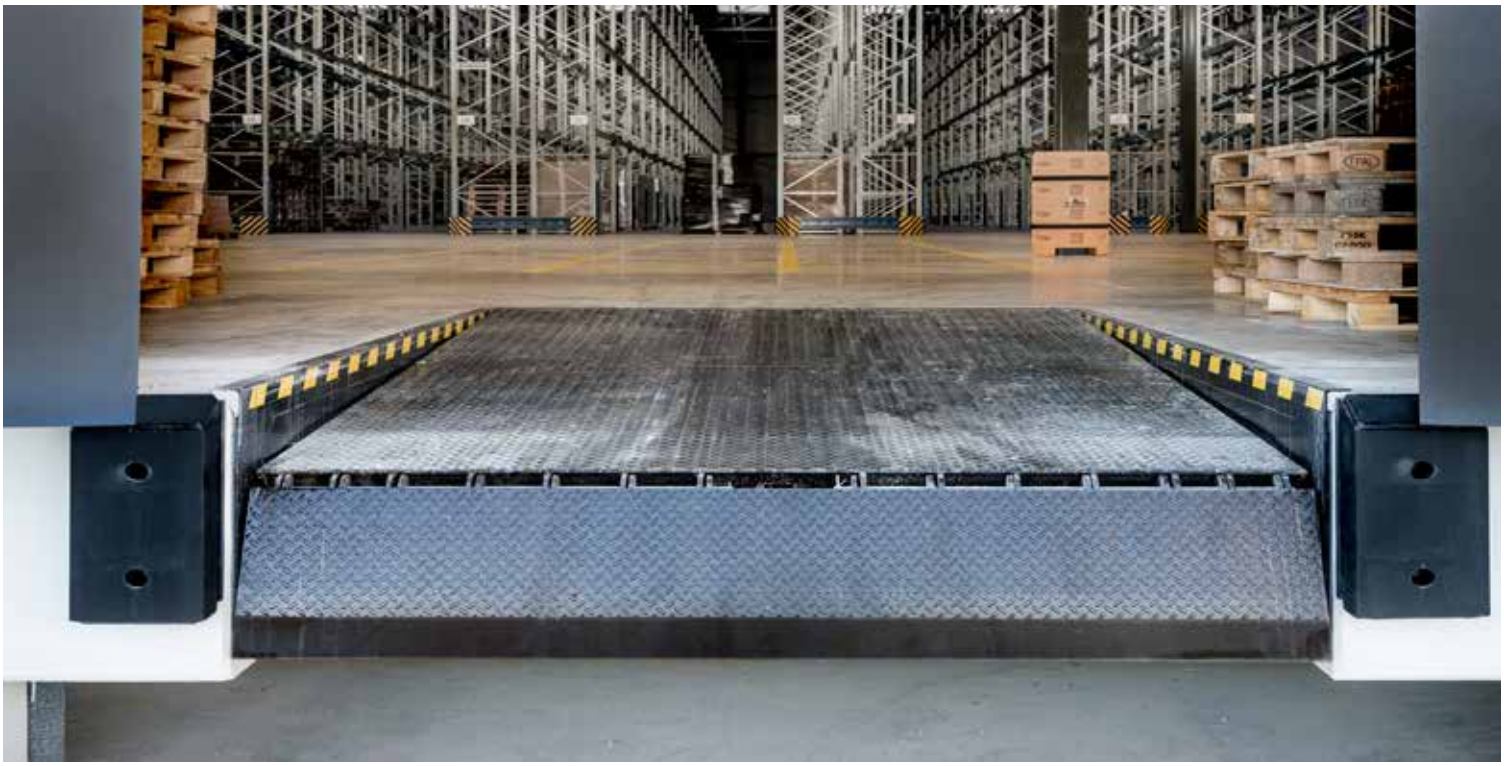

DSV Logistics is a global supplier of logistics solutions. The company has offices in more than 80 countries as well as an international network of partners and agents. With some 300 warehouses, DSV Logistics encompasses a total area of 4,700,000 m2. All around the world, highest priority is given to the safety of staff and truck drivers. This is why the logistics distribution center in Venlo, with a surface area of 30.000m² and certified with a 3-start BREAAM rating, opted for the ASSA ABLOY Entrance Systems.

Challenge

Sustainability, reliability and safety are of utmost importance for this building with its 3-star BREEAM rating. Maurice van den Heuvel, project manager at Ser-Pro, was hired as an external specialist by DSV Logistics to ensure that this building would be constructed in keeping with the latest standards. All facilities needed to meet the very highest quality requirements, so therefore also the automatic entrance systems.

Maurice explains: *"The entrance systems were somewhat of an urgent matter. Our delivery deadline was closing in on us, which meant we had to involve a specialist right away. We went looking for a reliable provider who could provide highest quality products professionally and within the shortest amount of time. I had already had the pleasure of working with ASSA ABLOY Entrance Systems before in another high-quality project which went off without a glitch. Not only are the experts at ASSA ABLOY Entrance Systems excellent listeners when it comes to defining a problem, but also in terms of translating needs into concrete and creative ideas. All of their advice focuses solely on the customer's issue at hand. The decision to involve ASSA ABLOY Entrance Systems in this project was therefore a logical next step."*

Requirements

- Guaranteed optimum security
- High quality door systems
- Durable and reliable entrance systems
- Fast delivery
- Professional and reliable provider

The solution

To meet the requirements and to ensure security, a complete solution by Crawford was implemented, consisting of dock levelers, shelters and overhead doors, combined with the dock-in traffic light and parking assistance system in one, wheel guiders and corner cushions.

The ASSA ABLOY Dock-IN system assisted the drivers in reversing their vehicles quickly and safely into a dock. A red light lets the drivers see when their truck is in the correct position. Once the truck is in position and the red light is lit, the Crawford overhead door can be opened. This means that there is no space between the truck and the building and therefore no more room for accidents. This solution also provides the added advantage that no doors remain open if there is no truck, which is also a benefit in terms of security.

Result

Theo Hoogveld (DSV Logistics) explains: "*It took some getting used to by the staff. They were used to operating the doors manually instead of electrically. The adjustment period however was very short. We are extremely pleased with the ASSA ABLOY dock-IN system, especially in terms of the increased degree of security this system offers. You can only open the door once the truck is fully docked. ASSA ABLOY Entrance Systems facilitates our efforts in achieving optimum security.*"

Maurice adds: "*I can say that I make high demands when it comes to the suppliers I work with and equally high demands on their products. ASSA ABLOY Entrance Systems not only provides top-quality doors, but also excellent service. This is of utmost importance when you are coordinating deadline-critical projects in which sustainability is a top priority. One further great advantage is that ASSA ABLOY Entrance Systems are also very transparent in terms of pricing. The price-quality relationship of products and service is by far superior to that of any other suppliers.*"
