General drawing/ Fixing Plan Albany RR300 Clean

9300R0002/b
Date: 15.06.2011

	Y	Z
with safety edge	470	DH – 93
with pre-running photocell	410	DH – 153

Available Sizes		
	DW	DH
min. (mm)	1000	1000
max. (mm)	3500	3500
with UPS with Albany MCC extension	1500	1000
with UPS without Albany MCC extension	1350	1000

Control System Albany MCC		
Opening speed	max. (m/s)	2,0
Closing speed	max. (m/s)	1,0

[ ] = Space needed for installation

ASSA ABLOY Entrance Systems is the world's most comprehensive supplier of entrance automation solutions. With our globally recognized product brands Besam, Crawford, Megadoor and Albany, we offer products and services dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations. With a holistic approach to the flow of goods and people, we create efficient solutions for each business, with the best possible balance of cost, quality and lifetime performance.
ASSA ABLOY Entrance Systems is a division within ASSA ABLOY.

High Performance Door Albany RR300 Clean

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Fraunhofer IPA TESTED DEVICE
Albany Door Systems RapidRoll® Cleanroom
Report No. AL 1003-514

Albany RR300 Clean

- Cleanroom suitability certified by Fraunhofer Institute
- Fulfils international standards and guidelines for cleanroom applications in accordance with DIN EN ISO 14644-1 and GMP
- ISO Class 5, GMP Class C
- Low particle emission
- Low air exchange thanks to fast opening and closing speed

DOOR DESIGN

The entire door (side frame, motor and roll cover, and bottom profile) is made from stainless steel. The smooth surface facilitates easy cleaning and avoids the accumulation of particle deposits.

NARROW SIDE COLUMNS / MINIMAL GAP

The dimensions of the door's side columns are kept to a minimum and allow the door to be installed in confined areas. The extremely small gap of the door curtain guide ensures minimal pressure loss.

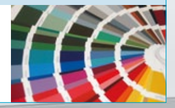

CABLE GUIDE SEALING

To prevent pressure losses, the cable guide is integrated and access openings inside the door are sealed.

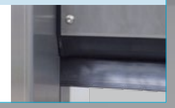

DOOR CURTAIN

The door curtain consists of PVC with white fabric reinforcement strips. Fabric reinforcement strips in a wide variety of RAL colors are available as option.

BOTTOM PROFILE

There is only a small gap between the bottom profile and the side columns. This minimises the pressure loss when the door is closed.

SAFETY FEATURES

The door is equipped with an electrical safety contact edge. A contactless pre-running safety photocell is available as option. In addition the door is equipped with a door line photocell which prevents the door from closing when an object is in the doorway.

INTEGRATED CABLE GUIDE

The cables are located in the side columns to provide a smooth surface and avoid surface irregularities that increase particle turbulence.

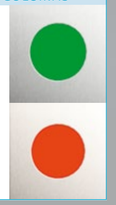

The supply cables of the pre-running safety photocell and teh electrical safety contact edge are guided reliably by internal cable carrier chain.

INTEGRATED TRAFFIC LIGHT IN THE SIDE COLUMNS

It is possible to signal the movement of the door via a traffic light system which can be inserted into either both side columns or just one side column.

A yellow flashing light, a stationary red/green light is available or a traffic light in separate stainless steel housing could be installed opposite. A red/green traffic light with recognition of directin is possible.

TOP ROLL COVER / MOTOR COVER

The door is equipped with top roll cover and motor cover as standard.

FREQUENCY CONVERTER CONTROL SYSTEM

The Albany MCC frequency converter control system and the optional UPS battery are located in a compact sealed compartment under the top roll cover.

MOTOR POSITION

The motor can be fitted either on the right or on the left hand side.

CONTROL UNIT AND MAIN SWITCH

The display unit with its user-friendly foil keypad and graphic display and the main switch are integrated in the side column.

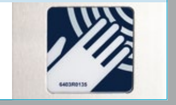

EGRESS

Self opening is available as an option. The UPS battery supplies power to the door control system in case of a power failure. UPS error and diagnostic messages are indicated by LEDs.

CONTACTLESS ACTUATOR

An optional contactless actuator is available for fast, hygienic opening.

Cleanroom Door Albany RR300 Clean

Production in a controlled environment, such as a cleanroom environment, is common practice in many industries. Some examples are medical applications, pharmaceutical production, research, electronics production, semiconductor production, and space flight. All components used in cleanrooms are subject to stringent requirements. Particularly in these areas, it is important to keep the production stations clean. In this connection, doors as components of cleanroom areas must prevent undesired air exchange and the uncontrolled entry of airborne particles.

For this area, the Albany RR300 Clean is used. This is the first door that as been tested by the Fraunhofer Institute for cleanroom suitability.

ADVANTAGES OF THE ALBANY RR300 CLEAN HIGH PERFORMANCE ROLLER DOOR

- Well suited to cleanroom isolation in accordance with DIN EN ISO 14644-1 Class 5
- Provides high air-tightness and keeps the pressure drop through the closed door at a minimum
- Fast opening and closing ensures very low air loss and minimize air exchange, which results in a low filter burden and increased cleanroom cost-effectiveness
- Smooth surface allows easy cleaning
- Design in accordance with GMP Class C
- Integrated cable guide for a smooth overall surface
- Contactless actuator (optional) enables fast, hygienic opening with a simple hand motion
- Integrated traffic light (optional)

DESIGN

Side frames, top roll and motor cover and the bottom profile are made from stainless steel (V2A). The cable guide is integrated. Gaskets and sealings to minimize air leakage.

DOOR CURTAIN

The door curtain is made from clear PVC with vertical white fabric reinforcement strips. Other versions with fabric reinforcement strips in a wide variety of RAL colors are available as option.

DRIVE UNIT

The drive unit is a geared brake motor. It can be fitted on the right or left.

CONTROL SYSTEM

The door is equipped with the frequency converter control system Albany MCC, which supports a wide range of speeds, supply voltages and options for connecting control and safety devices. The Albany MCC system is integrated in the overall structure under the roll cover. The display unit and main switch are located in the side column.

EGRESS OPTIONS

The control system Albany MCC can be equipped with a UPS battery for emergency operation after a power failure, a number of times.

SAFETY FEATURES

The door is designed according to the Workplace Directive of the UVV regulations and the harmonized CE Guidelines indluding the EN 13241-1.

INDICATION OF RISK'S

The security of the door is designed for normal use corresponding to the harmonized CE-Guidelines. In addition to this, difficult environmental conditions may affect the proper use of cleanroom doors. In this connection, we recommend that you consult our local sales engineers for expert advice on specific situations.

TECHNICAL DATA

Place of installation	Suitable for cleanrooms with pressure differences up to 50 Pa
Cleanroom class	ISO Class 5 – EN 14644-1
GMP	Class C
Leckage (door size 1500 x 2000 mm)	20 m³/h at a pressure difference of 25 Pa
Door dimensions	For details please see general drawing
(DW min./max.)	1000 / 3500 mm
(DH min./max.)	1000 / 3500 mm
DW min. and DH min. with UPS	1500 / 1000 mm
Opening direction	vertical
Drive unit	electrical
