SKILLS

- Solid Works
- AutoCAD
- Microsoft Applications
- Quality Management
- Mechanical Inspection

PERSONAL DETAILS

Current Location	Pune
Date of Birth	April 2, 2004
Male	

LANGUAGES KNOWN

English (Native)
Hindi (Native)
Marathi (Native)
Japanese (Basic)

CERTIFICATIONS

- Auto CAD
- Basic Tool Room Training

RESUME SUMMARY

Mechanical Engineering undergraduate at COEP Technological University with strong interest in design and core mechanical engineering. Proficient in SolidWorks and AutoCAD for 3D modeling and drafting, with knowledge of manufacturing processes, machining operations, and quality inspection. Experienced with mechanical measurement tools and basic CNC/VMC operations through industrial training.

EDUCATION

Graduation

Course	B.Tech/B.E. - Bachelor of Technology / Engineering (Mechanical Engineering)
College	COEP Technological University, Pune
Score	60.61%

Schooling	Class XII	Class X
Board Name	Diploma	Maharashtra
Medium	English	English
Year of Passing	2022	2019
Score	80.72%	72.8%

INTERNSHIPS

NIHVA Technologies Pvt Ltd | January 2026 – June 2026 – Present

- Developed SolidWorks models for retractable roofs, automatic gates and rolling shutter systems.
- Performed costing and weight estimation for 10+ fabricated components.
- Supported material selection, design modifications and technical documentation.
- Assisted engineers in design validation and manufacturing feasibility review.

Avdhoot Industries Pvt Ltd | December 2022 - May 2023

- Completed ~480 hours of industrial training in manufacturing and quality control environment.
- Conducted dimensional inspection of 300+ machined components using verniercalipers.
- Identified defective components during inspection helping reduce scrap rate by approximately 8–10%.
- Prepared basic AutoCAD drawings and supported minor design corrections for shop-floor reference.

Vignahar Industries Pvt Ltd | August 2021 - September 2021

- Gained exposure to rubber molding and finishing processes.
- Inspected 120+ molded rubber components for dimensional accuracy and surface defects.
- Assisted quality engineers in documenting inspection reports and defect classification.
- Observed molding, trimming and finishing operations to understand manufacturing workflow.

PROJECTS

Compressed air generation using vehicle suspension | January 2025 - April 2025

- Designed a prototype to convert vehicle suspension vibrations into compressed air.
- Developed concept models and mechanical layouts using AutoCAD.
- Integrated suspension motion with a mechanical air compression mechanism.
- Conducted experimental testing of the prototype system.
- Generated compressed air pressure of approximately 2–4 bar during testing.

3 in 1 solar operated sprayer | January 2022 - March 2022

- Designed a portable solar-powered agricultural sprayer to reduce manual pumping effort in conventional sprayers.
- Integrated solar panel, battery storage, DC pump and spraying mechanism for continuous operation.
- Improved spraying efficiency by approximately 40% compared to manual sprayers.
- Developed frame structure, tank mounting and piping layout ensuring portability and durability.
- Conducted basic performance testing to evaluate spray coverage and pump efficiency.
